

## Aplicación en HTML

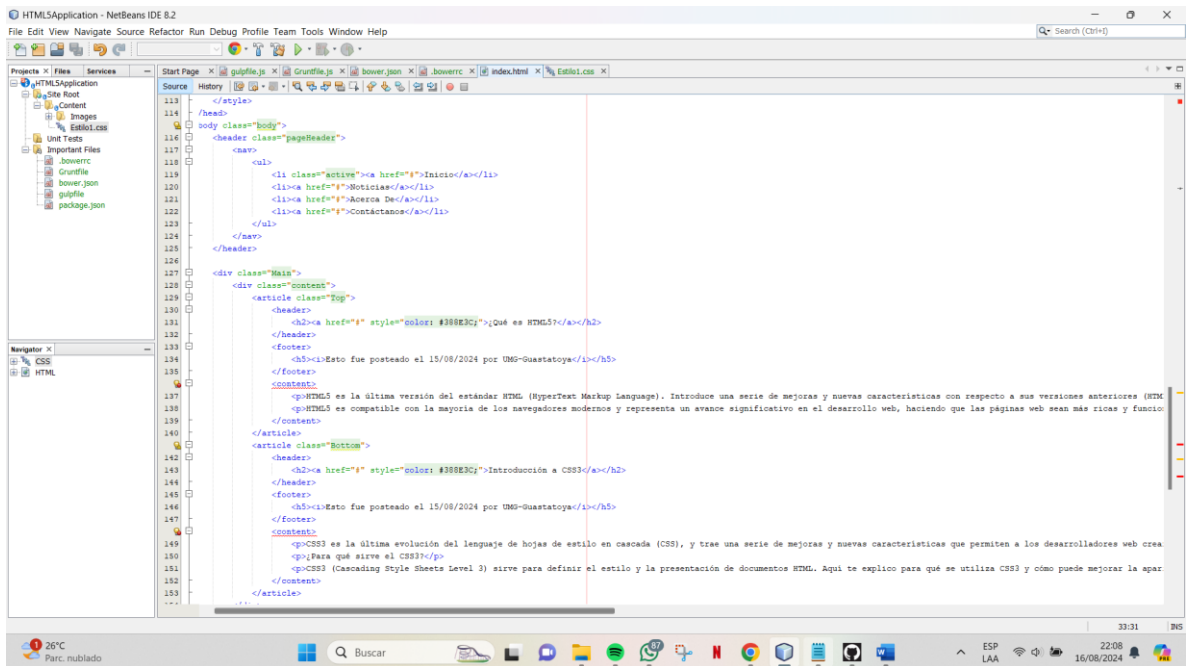

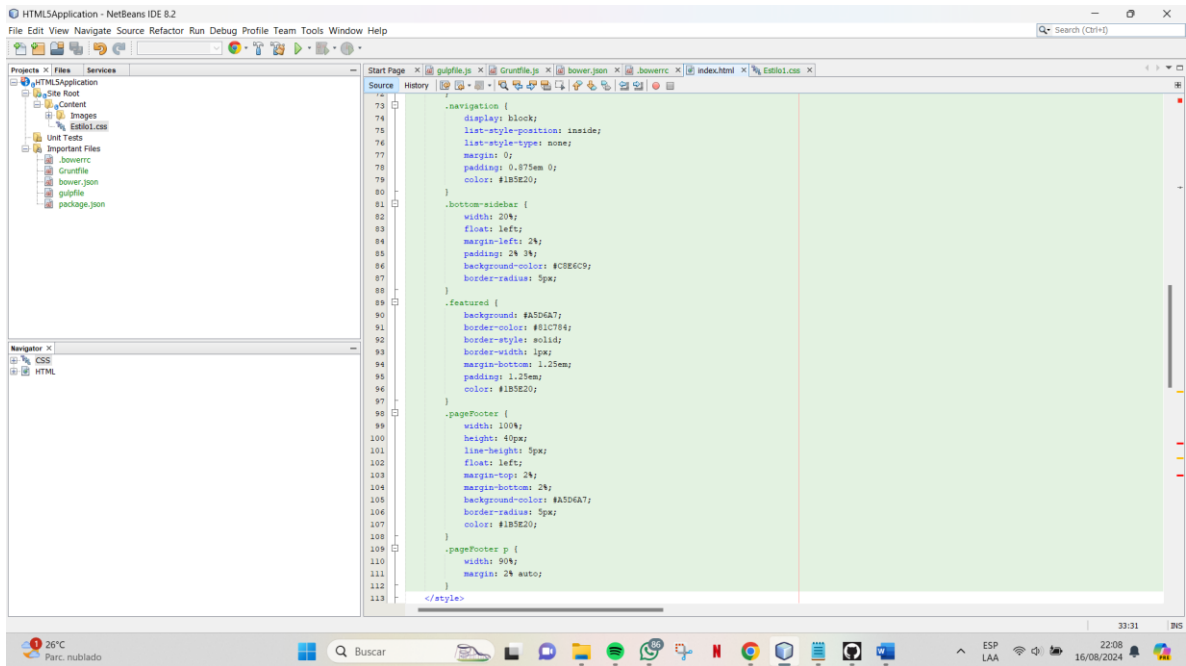

The screenshot shows the NetBeans IDE interface with the following components:

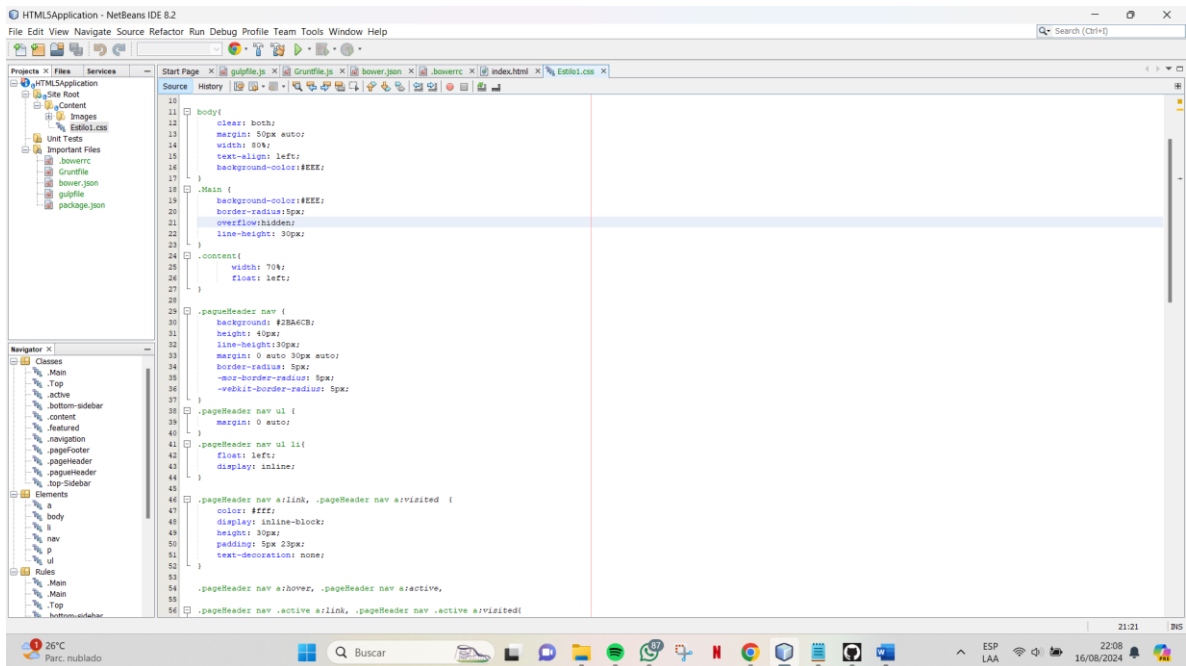

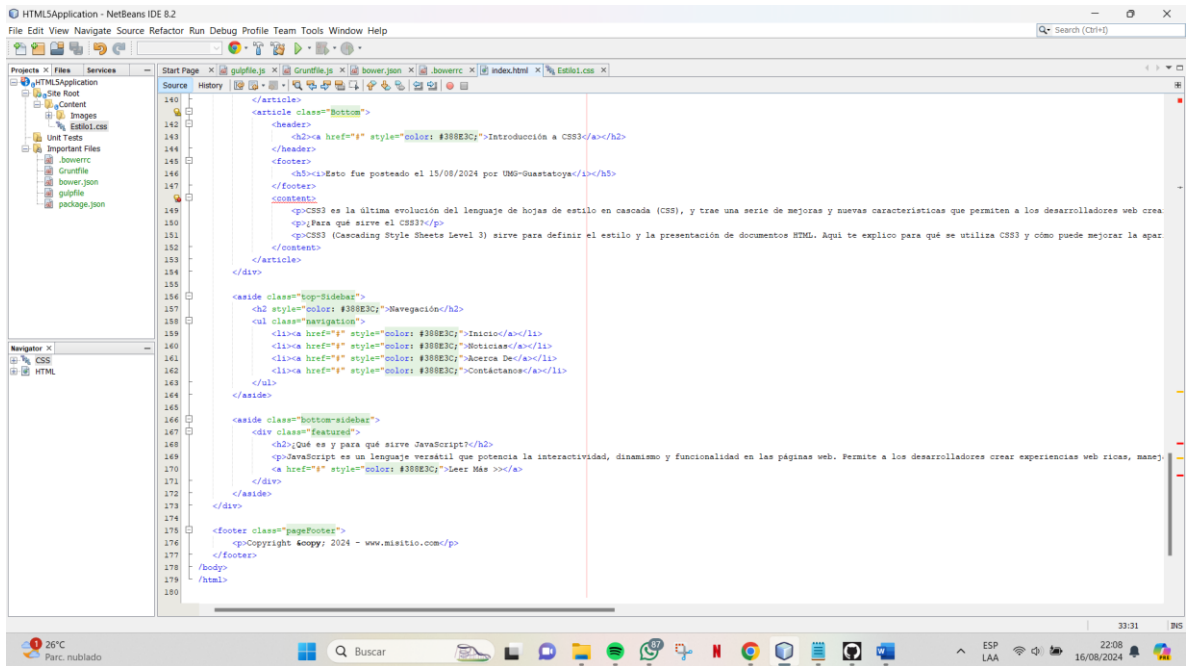

- Project Explorer:** Displays the project structure for 'HTML5Application', including folders like 'Content', 'Images', 'Unit Tests', and 'Important Files', and files like 'bower.json', 'Gruntfile', 'gulpfile', and 'package.json'.
- Source Editor:** Contains the initial HTML and CSS code. The HTML code includes a DOCTYPE declaration, language and charset attributes, a viewport meta tag, a description meta tag, a keywords meta tag, and a title. The CSS code defines styles for the body, main content area, and a page header navigation bar.
- Navigator:** Shows the 'CSS' and 'HTML' files in the project.
- Toolbar:** Includes standard IDE tools like Run, Debug, and Test.
- Status Bar:** Displays the current temperature (26°C) and the time (22:07).
